Documents required for Summative Assessment Semester 2, 2022

21 October 2022

Dear ICT students

It has come to the attention of ICT Faculty management that there are students that are paying other people to write assessment for them (referred to as “ghost writers”). These “ghost writers” gain access to assessment venues by using forged documents. Please note that this is a serious infringement and any student involved in such fraudulent behavior will be expelled from the University immediately.

A different identification method will therefore be used for the summative assessment of 2022 semester 2: All ICT faculty students need the following documents to enter the assessment venue:

- ID document
- Student card
- Proof of registration

All 3 of these documents are required and in a case where one of these documents are not available, a student should bring an affidavit from the South African Police Services stating why the document is not available. The invigilator will take a photo of the student. To confirm that the correct student did write, the photo of the student, student number and name of the student will be sent to the faculty. Other checks will also be done on student cards.

Best regards

Dr. Deon du Plessis
Assistant Dean Teaching and Learning
Faculty of ICT
